MEMORANDUM

DATE: September 1, 1995 5400.1

TO: A. Hemlick, Operations Management, Bldg. T891E, X7604

FROM: *M.B. Murdock*
M. B. Murdock, Ecology, Bldg. T130B, X3560

SUBJECT: MIGRATORY BIRD, THREATENED AND ENDANGERED SPECIES, AND
WETLANDS EVALUATION FOR USGS ROCK CREEK FLUME - MBM - 081 - 95

On September 1, 1995 Ecology personnel surveyed the work area for the OU2 Pipe Removal Project. Some wetlands concerns were identified in the work areas. These areas were flagged with large pink pin flags to identify them. One is located at the western-most end of the work area where there is an equipment housing box. A second is located at the outlet end of the effluent pipe where it ends in a cattail patch. The third is just east of where the pipe crosses under the North Access Road. No excavation or surface disturbance may be allowed within the areas marked by the flags. No threatened and endangered species concerns were identified. If the scope of the project changes, or includes removal of the pipe to the north side of the drainage, please contact Jeff Krause at 3363 for further wetlands evaluation.

Clearances for migratory birds are effective through September 15, 1995. Should work not start by that date, this clearance will require extension.

Should you have comments or questions, please feel free to contact me at extension 3560 .
